

# Ankit Maurya

+91 801-007-8449 | ankit.fsdev@gmail.com | linkedin.com/in/ankitmaurya-byte | github.com/ankitmaurya-byte

## TECHNICAL SKILLS

---

**Languages:** JavaScript, Golang, Next.js

**Frameworks:** React, Node.js, Redux, Express

**Developer Tools:** Git, GitHub, Docker

**Databases:** MongoDB, MySQL, Firebase, PostgreSQL

## EXPERIENCE

---

### DataMingle Analytics

Remote

*Full Stack Developer Intern*

*August 2024 - present*

- Built a full-fledged website from scratch using React, Node.js, PostgreSQL, and Sequelize ORM.
- Collaborated with a team to integrate additional tools and frameworks for optimal performance.
- Designed efficient APIs for data retrieval and management, improving page load time.

## PROJECTS

---

### Recipe Web App | *React, Redux, Firebase, Axios*

- Developed a responsive recipe web app for 1000+ recipes and 500+ users, featuring search, dish favoriting, and user profiles.
- Utilized Firebase for real-time data syncing, reducing data retrieval time by 40%.
- Implemented search functionality with Axios for external API integration, ensuring 95% data accuracy.

### E-commerce Website | *MERN Stack (MongoDB, Express, React, Node.js), Redux*

- Engineered a full-featured e-commerce site managing 1000+ products and 300+ users, enabling 100+ daily transactions.
- Integrated shopping cart, search, and user authentication using Redux and JWT, improving response time by 30%.
- Leveraged MongoDB and Express for efficient back-end data handling, scaling to 500+ daily users.

### Movie App | *React, Redux, Axios*

- Built a movie app providing real-time access to 2000+ movies using TheMoviesDatabase API, handling 98% uptime.
- Optimized genre-based search, enhancing user engagement by 40%.
- Implemented smooth navigation with React Router for 50+ daily users.

## ADDITIONAL SKILLS

---

- Coding Experience: Solved 500+ coding questions, including **200+ on LeetCode**, demonstrating strong problem-solving skills.
- Data Structures and Algorithms: Proficient in complex data structures (graphs, trees) and dynamic programming, optimizing solutions for performance and scalability.
- Chat Application: Developed a chat application using React and Firebase, integrating Firebase OAuth for user registration and login, supporting 1000+ concurrent users.
- Web Scraping: Proficient in web scraping using Cheerio, parsing HTML and manipulating DOM for data extraction.
- Automation: Experienced in automation with Puppeteer, controlling headless Chrome/Chromium browsers for web testing and scraping.

## EDUCATION

---

**Vartak College, Mumbai**

2022 - 2025

B.Sc. in Computer Science

CGPA: 7.0

Scored 78% in HSC and 80% in SSC
