* TECHNICAL SKILLS

• Programming Languages

o Primary: JavaScript (ES6+), TypeScript, Node.js ,Golang

• Frontend Development

o Frameworks: React.js, Next.js, Angular

o State Management: Redux, Context API, React Query

• Visualization: D3.js, React Flow, Chart.js

• Backend Development

o Runtime: Node.js, Express.js

o Databases: PostgreSQL, MongoDB, MySQL, Redis

o ORM/ODM: Sequelize, Mongoose

o Authentication: JWT, OAuth, Firebase Auth

• DevOps & Cloud

o Containerization: Docker

• CI/CD: Jenkins, GitHub Actions

EXPERIENCE

CarbonCompete ♥ Remote

Frontend Developer

January 2025 - Present

- Led frontend development using **React**, **TypeScript**, and **React Flow** for data visualization
- Improved application performance by identifying and resolving critical bugs and technical debt
- Collaborated with UX team to implement responsive and intuitive user interfaces

Sminetech Solutions ♥ Remote

Full Stack Developer

December 2024 - Present

- Developed and maintained multiple client websites using MERN stack and modern development practices
- Implemented SSO authentication using Passport.js with multiple strategies (Google, GitHub) and session management
- Built secure session-based authentication system with Redis for session storage and cookie management
- Integrated Redux Toolkit and React Query for efficient state management and API caching
- Implemented responsive designs using Tailwind CSS, ensuring cross-browser compatibility

DataMingle Analytics ♥ Remote

Full Stack Developer

August 2024 - December 2024

- Led the development of a full-stack web application using **React**, **Node.js**, and **PostgreSQL**
- Implemented interactive data visualizations using **D3.js**, resulting in a 40% increase in user engagement
- ullet Architected and implemented secure user authentication system using ${f JWT}$ and role-based access control

PROJECTS

Recipe Web App | React, Redux, Firebase

View Project

- Developed a responsive recipe platform with 1000+ recipes and advanced search functionality
- Implemented real-time data synchronization and user authentication using Firebase
- Created dynamic filtering and pagination system improving user experience

- Built a full-featured e-commerce platform handling 1000+ products and users
- Implemented secure payment processing with Stripe and automated email notifications
- Created comprehensive admin dashboard for product and order management
- Developed user review system with CRUD operations

Movie App | React, Redux, TailwindCSS

• Created a movie discovery platform integrating with TheMoviesDatabase API

- Implemented advanced search and filtering functionality
- Designed responsive UI using TailwindCSS and modern React patterns

EDUCATION

B.Sc. in Computer Science

2022 - 2025

Vartak College, Mumbai CGPA: 7.0

Notable Coursework: Data Structures, Algorithms, Database Systems, Web Development

Higher Secondary Certificate (HSC)

Science Stream with Computer Science

Score: 78%

Secondary School Certificate (SSC) 2020

Score: 80%
